Welcome to the 2012 edition of the Green Pages.

In this directory, you will find a wide range of professionals who design, build, support, and maintain environmentally friendly buildings, landscapes, and communities - Northwest EcoBuilding Guild members.

If you are planning to remodel or build a new home or office in an environmentally responsible way, with these Green Pages, you can assemble an entire team of Guild members—all of whom share similar values, and many of whom have worked together before. You can find a real estate professional who can help you locate an appropriate site, a mortgage broker who can help you arrange a green loan, a building designer well-versed in the use of sustainable materials, a landscape designer who works with native planting, a contractor familiar with the newest healthy finishes, a supplier who stocks all the ecologically-minded products needed.

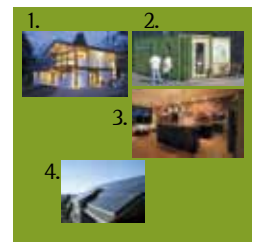

They are all here—and more! Members of the Guild are nationally and regionally recognized leaders in their fields. In addition, our members include passionate newcomers and interested homeowners. The wonderfully varied interpretations of sustainable design and building by our professional members will satisfy a wide range of clients' values and ideals, programs and budgets, desired styles and features – from yurts and owner-built straw bale structures to energy-saving mixed-use and small commercial buildings.

Letter from the Seattle Chapter President

Building healthier and smarter, and consuming fewer resources – that is the future of our living environment, and it's even more relevant in today's economy.

The Northwest EcoBuilding Guild has been pushing the envelope for almost 20 years and continues to be at the forefront of green building. People from all over the region and across the country come to the Guild community to find information and experts on sustainable building.

Our members and volunteers work throughout the year to help educate, inspire, and provide sustainable solutions. The Guild community has shown over the years, that individuals can indeed come together to create solutions – and have fun while doing so. Together, we really can make a difference!

Here are some highlights of the Seattle Chapter's programs and events:

- We host special events that showcase our members' work and provide green building education opportunities to participants. The **Seattle Green Home Tours** have been a huge success, with over 1,000 people visiting the homes each year. (www.seattlegreenhometour.org). The **10x10x10 Green Building Slam**, celebrating its 10th anniversary this year, is a fast-paced fun-filled evening which features behind-the-scenes accounts of 10 projects, each given 10 minutes and 10 slides to share their story. (www.greenbuildingslam.org).
- We provide opportunities for **hands-on learning** at various fairs and festivals throughout the year, including the Mother Earth News Sustainability Fair, the Shoreline Solarfest, and the Seattle Tilth Harvest Fair. Everyone can benefit from **experts** in the Guild community at these fun, family-oriented events.
- We offer **regular educational sessions** and other educational opportunities for building professionals and homeowners to help them stay on the cutting edge of green building.
- **We are now on the Eastside!** We have started a series of regular educational meetings to respond to growing interest and demand in the communities east of Lake Washington. Stay tuned to our website for the latest details as we expand the program: www.ecobuilding.org/guild-chapters/seattle.

I hope you enjoy this special edition of the Green Pages. And I hope to see you at one of our events or through one of our programs!

Grace Huang

President, Seattle Chapter
Northwest EcoBuilding Guild

The Northwest EcoBuilding Guild

empowers people through education to transform the built environment for long-term sustainability. Founded by green building pioneers in 1993, the Guild has become a community of construction-related professionals, homeowners, and partners concerned with ecological building in the Pacific Northwest.

The Northwest EcoBuilding Guild's Mission is to support through education the progressive work of our members in the Pacific Northwest in order to improve the relationship between our communities and our built environment.

We provide open-source educational tools to the construction industry and the general public in order to encourage building practices that

dramatically reduce carbon emissions, are self-sustaining, contribute to local economies, and create optimal conditions for human health and community. We consider the needs of the seventh generation in all that we do and encourage inclusive discourse to that end. We invite you to join us in becoming part of this community.

Letter from the Editor

They're back!

The last print edition of the **Green Pages** was in 2010. To be better stewards, the regional organization decided to discontinue the regional printed Green Pages in favor of online searchable directories and online advertising.

Back by popular demand!

The Seattle Chapter chose to bring the print edition back in 2012 to the Seattle Metro area. Consumers and our members wanted the print edition and we delivered.

We partnered with **Seattle Natural Awakenings** to bring 15,000 copies of this Special Edition to news stands in September 2012! 3,000 more copies are going to the Seattle Chapter for distribution at sustainable community events like the 10x10x10 Green Building Slam on September 15th and the Built Green® Conference on September 27th.

In my last Letter from the Editor in 2010, I wrote about the Chinese character for crisis being a combination of two symbols - one for "danger," the other for "opportunity." I spoke about how many of our members were weathering the economic crisis by seizing the opportunity instead of being alarmed by the danger.

Two years later, we have seized opportunities and are pushing the envelope towards a more resilient future.

In this election year, there are important choices to make; besides our choice of leadership, there are many important issues to consider: environmental regulations, protection and enforcement, women's rights, health care, and social equality.

Seize the Opportunity

I encourage everyone to exercise your right to vote, volunteer, or participate in "get out the vote" activities. This year, it is especially

important in light of actions taken in other parts of this country to restrict voting rights. Do your part so that all Americans have a voice.

Buy Local. Buy Organic. Build Green. Vote.

Use your influence when and where you can, because you can.

Never doubt that a small group of thoughtful, committed citizens can change the world. Indeed, it is the only thing that ever has.

- Margaret Mead

People of the Guild are one voice for sustainability in the Seattle Metro area. This special edition celebrates the greater sustainable living network, our connectivity, and our passion to serve and protect our planet for our generation and generations to come.

As the Guild's web of influence grows, so does our diversity. This edition features new categories acknowledging the many fields evolving from sustainable building. New in the 2012 Green Pages: Lead-safe Renovators, Earthquake Retrofitting, and Credit Unions.

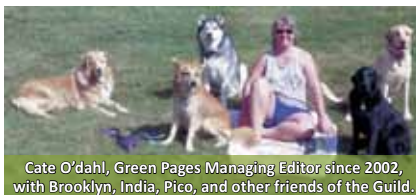

"Thank you!" to our Sponsors:

King County GreenTools, Seattle Natural Awakenings, Envision | Remodeling, and Dirty Dog Productions. I want to especially thank Grace Huang, Chapter President, for her vision to bring back the print edition, and the entire Seattle Chapter Steering Committee.

Most important of all are the Seattle Chapter Guild Members and Green Pages Advertisers. Thank you for making our comeback edition a shining success.

Cate O'dahl

Green Pages Managing Editor

Cate O'dahl, Green Pages Managing Editor since 2002, with Brooklyn, India, Pico, and other friends of the Guild.

This edition of the Seattle Chapter Green Pages is dedicated to an important member of our pack.

For 13 fun-filled, event-filled years, India was the beloved Labrador Retriever of Robert Burns of Envision | Remodeling, Green Pages, Green Home Tour, and 10x10x10 Sponsor.

India has been good pals with Brooklyn for 12 of those years, our own practically perfect Golden Retriever, experiencing many

wonderful moments together, mud rivers at Marymoor, swimming at Magnuson, or just lounging in the sun.

After 13 action-packed adventurous years, India was put to rest on Friday July 20, 2012 with her family and her extended family beside her. She will be greatly missed by the Burns family, the O'dahls, and many of the Guild family and friends who knew India was a truly wonderful companion.

Cate, Sheldon, & Brooklyn O'dahl

Built Green® Real Estate Professional Training by ESP Services and Built Green® Washington

Learn to view the house as a system in this engaging series that defines the many shades of green building.

Distinguish green building programs, topics, and terminology that enhance your ability to market and sell the features of Green Homes.

Navigate this expanding market with Cate O'dahl, 20-year veteran of green building and winner of the 2010 Built Green Pioneer award.

Position Yourself in the *new* Marketplace:

This 18 clock hour series is certified by Built Green® for Real Estate and Appraiser Clock Hours.

Six sessions provide detailed information to help distinguish green building certifications, learn about the features and benefits of homes that sell and enhance value, understand and communicate basic building science, and **sell** high performance homes.

Be on the forefront of this emerging market by distinguishing yourself as a Built Green® Professional or community leader. Homes with sustainable features and certifications are selling for more and in less time in King County.

Contact your local Built Green Program. Let them know **you** want this training **TODAY!**

ESP Services 425-670-1342

A Breath of Fresh Air

A Ceiling-Insert Spot ERV Can be a Cost-Effective Solution for Whole-House Ventilation

WhisperComfort provides a tempered air supply, humidity control, and a balanced amount of exhaust to help maintain neutral pressure in the house. And it's cosmetically appealing, too, because only the grille is exposed, not the entire unit.

- Only one unit needed for a 1750 sq. ft., 2 bedroom house or apartment
- Dual setting air volume for 40/20 or 20/10 CFM
- Easy installation (and no drain line required)
- Ideal for new airtight houses built to meet energy-efficiency standards – backdraft damper included

Helps insure that volatile organic compounds (VOCs) and other chemical and biological indoor air pollutants are vented out and replaced with fresh air. Can be used to meet ASHRAE 62.2 standards for Ventilation and Acceptable Indoor Air Quality in Low-Rise Residential Buildings when sized accordingly.

For more information, please visit panasonic.com/WhisperComfort

Contact your local Panasonic representative for more details:

LD Arch Design is a green architecture firm focusing on residential additions and remodels. Sensitively transform your house with thrifty and thoughtful design. Find the beauty in the existing and blend carefully with updates. See how the "less is more GREEN" approach can work for you – less space, less new stuff, less toxic stuff, less energy, and less water – which results in less cost for a rejuvenated home with a smaller ecological footprint.

West Coast Electric Highway

[excerpt from the West Coast Green Highway website]

The "West Coast Electric Highway" is an extensive, tri-state network of electric vehicle (EV) DC fast charging stations along Interstate 5. When complete, the Electric Highway will span the 1,300 miles from the Canadian border to the California border and with public fast charging locations every 25-60 miles.

The fast charge technology along the Electric Highway allows drivers to re-charge mass-produced electric vehicles such as the Nissan Leaf and Mitsubishi "i MiEV" in 30 minutes or less. Each location also includes Level 2 equipment to re-charge other plug in electric vehicles such as the Ford Focus and Chevrolet Volt. Read more at www.west-coastgreenhighway.com/electrichighways.htm. Providing fee-free charging stations for Washington State's electric vehicles

Charge for Change

The Charge for Change program is a community action project of the Seattle Electric Vehicle Association's (SEVA). SEVA developed this program to promote accelerated adoption of plug-in electric vehicles. Plug-in electric vehicles contribute toward addressing multiple national concerns:

Security Health Environment
Economy Transportation Jobs

Office Support

Dirty Dog Productions

425-670-1342

swoesp@gmail.com

Dirty Dog Productions provides document production support services for desktop publications, such as brochures, directories, and magazines. DDP has successfully managed the layout and pre-press coordination for this Green Pages publication, as well as the NWEBG Green Pages directories from 2007 to 2010.

We can also support your organizational management and help you streamline processes, when necessary. As NWEBG Regional Membership Administrator since 2005, Dirty Dog Productions has enhanced the the Guild's membership administration and procedures.

DDP has proven experience supporting successful event promotions in association with ESP Services, such as the 2012 Seattle Green Home Tour.

Contact us today to see how we can provide support to your organization, your publications, and your events.

Rainwater Harvesting & Low Impact Development

EarthSystemsNW

206-619-4773

bruce@earthsystemsnw.com

www.EarthSystemsNW.com

We specialize in affordable, customized rainwater harvesting systems. We offer a full range of cisterns including creative options for smaller urban lots such as soft-sided bladders for under decks or porches. We are a recognized contractor in the Seattle Rainwise program; ask us if your place qualifies for rebates. We provide fully potable systems, enabling a home to run entirely off of rainwater. We also use cisterns to remedy drainage and stormwater issues. Contact us for a consultation.

Mighty House Construction

206-459-8577

info@mightyhouseconstruction.com
www.mightyhouseconstruction.com

Mighty House Construction is founded by a third generation, 20-year home remodeling veteran and a green building junkie. Our combined skill and passion give us the ability to see beyond the "need" and create innovative solutions that allow individuals and families to live, play, and grow better in their home.

Skilled, responsive and dependable, we bring outstanding craftsmanship and value to every project – from basic renovations to whole-house remodels and additions.

More than "LEED." More than "Green Building." At Mighty House we believe that sustainable building practices should be a part of every building project – period. However we look at sustainability from a whole life perspective; how you use your home and financial considerations are just as important as green building products, energy conservation, and space functionality. It is important to us to build fabulous, useful, and healthy indoor and outdoor environments that tread lightly on the planet without guilt or financial burden.

We look forward to hearing how we can bring our exceptional building practices and outstanding solutions to your home.

Guild Membership Benefits

The Guild is working to give our members the support they need in implementing and growing the market for sustainable buildings, technologies and services.

Benefits of a membership include:

- **Chapter Meetings & Events**

Monthly Chapter events offer the opportunity to meet other green building professionals and interested homeowners in your area to exchange ideas, information, and resources. Visit our online Events Calendar for a full listing of upcoming events in your area.

- **Education & Training**

Ongoing educational events feature a variety of speakers, presentations, and roundtable discussions led by local and regional experts.

- **Annual Guild Retreat & Symposium**

Our annual Member Retreat, which takes place in October, features locally and nationally-recognized leaders in green building and offers an opportunity to rest and relax in a retreat atmosphere with like-minded people.

- **Online Member Center**

Guild members have access to our Member Center, where you can promote your sustainable company, projects, and events.

- **Online Green Pages Directory**

All professional Guild members receive a search engine optimized, link & logo enabled profile in our online Green Pages directory, the only Northwest, free-to-the-public, multi-media directory dedicated exclusively to advancing sustainable building professionals, techniques, practices, and products.

- **Online Advertising & Sponsorship**

We are proud to announce a new, enhanced opportunity to promote your sustainable or green building affiliated business or organization through online advertising. The Guild also has a variety of opportunities to support Guild projects and events through sponsorship packages.

Interested in becoming a Guild Member?

Join Online to begin receiving your Membership Benefits immediately. Or join by mail using our Membership Registration Form, available by download.

Need to renew? Renew online by credit card in the Guild Member Center, or renew by mail using our Membership Renewal Form, available by download.

Questions about Guild Membership? Contact us at membership@ecobuilding.org.

Membership Levels

The Northwest EcoBuilding Guild offers Individual and Business membership levels to accommodate everyone. All our membership levels enjoy free or discounted entry to regional and chapter events, Guild email announcements & newsletter, and access to our online Member Center for posting events, project spotlights and job listings.

Individual

Student - \$25

This is a discounted level for students enrolled in higher education who would like access to the valuable resources the Guild provides.

Friend of the Guild - \$45

This level is for homeowners and green building enthusiasts! Participate in the discussion with other like-minded individuals.

Business

Basic Professional - \$80

This membership level is designed for self-employed individuals working in the green building community. This is an excellent way to promote your individual business or services. Includes an online Green Pages profile listing in 1 category.

Small Business - \$215

This membership level is designed for businesses with under 10 employees. Enhanced benefits include Guild discounts, opportunities for employees, and an online Green Pages profile listing in up to 3 categories.

Large Business - \$450

This membership level is designed for businesses with 11 - 25 employees. Enhanced benefits include Guild discounts, opportunities for employees, and an online Green Pages profile listing in up to 5 categories.

Corporation - \$650

This membership level is designed for large businesses with over 26 employees. Enhanced benefits include Guild discounts, opportunities for employees, and an online Green Pages profile listing in up to 7 categories.

All online Green Pages profile listings include space for a description of your business or service, website & blog links, RSS feed, logo and photo.
